Experiment 7 — File Handling

Python Lab Manual — Program and Output

EX. NO: 7(a) — Copy from one file to another

PROGRAM

```
# Creating an output file in writing mode
output_file = open("OUTPUT.txt", "w")

# Read from the input file and write to the output file
with open("INPUT.txt", "r") as scan:
    output_file.write(scan.read())

# Close the output file
output_file.close()
```

OUTPUT / RESULT

```
No printed output.
The contents of INPUT.txt are copied to OUTPUT.txt.
```

EX. NO: 7(b) — Word count

PROGRAM

```
number_of_words = 0

with open("INPUT.txt", "r") as file:
    # Read the content of the file
    data = file.read()

    # Split the content into words
    words = data.split()
    number_of_words += len(words)

print(number_of_words)
```

OUTPUT / RESULT

```
5
```
